Treasury Financing Operations

Tax Anticipation Bills

On November 18 tenders were invited for $2,500 million, or thereabouts, of 142-day tax anticipation bills to be dated December 1, 1971, and to mature April 21, 1972. They will be acceptable at face value in payment of income taxes due April 15, 1972.

Tenders were opened on November 24 and totaled $4,778 million, of which $2,506 million was accepted. The average bank discount rate was 4.558 percent. The limit for noncompetitive tenders from any one bidder was $400,000 and they totaled $245 million.

On December 2 tenders were invited for $2,000 million, or thereabouts, of 191-day tax anticipation bills to be dated December 13, 1971, and to mature June 21, 1972. They will be acceptable at face value in payment of income taxes due June 15, 1972.

Tenders for the 191-day bills were opened on December 8 and totaled $4,383 million, of which $2,010 million was accepted. The average bank discount rate was 4.273 percent. The limit for noncompetitive tenders from any one bidder was $300,000 and they totaled $260 million.

Payment for up to 50% of the amount of bills allotted for each of the issues could be made through Treasury tax and loan accounts.

9-Month and One-Year Bills

On November 17 tenders were invited for $500 million, or thereabouts, of 275-day Treasury bills, representing an additional amount of bills dated August 31, 1971, maturing August 31, 1972, and for $1,200 million, or thereabouts, of 366-day Treasury bills to be dated November 30, 1971, to mature November 30, 1972, both series to be issued November 30. These issues were to refund $1,702 million of bills maturing November 30. Tenders were opened on November 23.

Tenders received for the 275-day bills totaled $1,529 million, of which $500 million was accepted, including $17 million of noncompetitive tenders. The average bank discount rate was 4.580 percent.

Tenders received for the 366-day bills totaled $2,099 million, of which $1,201 million was accepted, including $24 million of noncompetitive tenders. The average bank discount rate was 4.563 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in November totaled $15.6 billion, replacing $14.8 billion of maturing bills. There were three 91-day issues and one 90-day issue of $2.3 billion and three 182-day issues and one 181-day issue of $1.6 billion. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $10,000, $15,000, $50,000, $100,000, $500,000, and $1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of $10,000. Tenders over $10,000 must be in multiples of $5,000.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $200,000 or less from any one bidder, are accepted in

Treasury Financing Operations - (Continued)

full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in November totaled $3,336 million, consisting of twenty certificates of indebtedness and two notes. Redemptions for the month totaled $3,187 million. At the end of November, foreign series securities outstanding totaled $14,293 million. (Details are shown on page 63.)

No foreign currency series securities were issued or redeemed in November. At the end of November, foreign currency series securities outstanding totaled an equivalent of $2,008 million and were denominated in German marks and Swiss francs. (Details are shown on page 65.)

Note: Details of Treasury market financing operations are shown elsewhere in tables on public debt operations.

Note: Net expenditures represent disbursements less propietary receipts from the public and certain intrabudgetary transactions applicable to the expenditure account. Net lending represents loan disbursements less loan repayments. If only one column is shown for an agency, the amounts represent net expenditures, unless otherwise noted. Agency shifts are shown in this table beginning with the period of such shifts, figures prior to the shifts have not been adjusted.

1/ Includes net lending.

2/ See footnote 5.

3/ Figures prior to fiscal 1967 represent expenditures for the Federal Aviation Agency.

4/ Reported on an accrual basis.

5/ Beginning fiscal 1963 expenditures of Federal Old-Age and Survivors Insurance Trust Fund and Federal Disability Insurance Trust Fund are included under Health, Education, and Welfare Department and expenditures for the Unemployment Trust Fund under Labor Department.

6/ For content see Table FFO-4.

7/ Includes $4,019 million estimate for distribution of Federal tax revenues to state and local governments, $1,000 million for pay increases (excluding Department of Defense), and $950 million for contingencies.

* Less than $500,000. r Revised.

Note: The memorandum section of various tables in the Federal Budget presents the trust fund receipt and outlay data on the same concept as columns (3) and (9) above. Trust interfund transactions are payments from one trust fund to another trust fund which result in the recording of a receipt and an outlay, and are excluded in calculating trust fund receipts and outlays. Intragovernmental transactions are payments from Federal funds to trust funds, and vice-versa. Intragovernmental transactions as shown in this table consist of Federal fund payments to trust funds -- it does not include trust fund payments to Federal funds of $29 million.

1/ For content see columns (7) and (8).

2/ For content see columns (10-13).

3/ Includes net taxes and other receipts, mainly deposits by States and Federal employee retirement contributions.

4/ This column excludes trust fund payments to Federal funds, such as charges for administrative expenses of Social Security Act.

Note: The memorandum section of various tables in the Federal Budget presents the trust fund receipt and outlay data on the same concept as columns (3) and (9) above. Trust interfund transactions are payments from one trust fund to another trust fund which result in the recording of a receipt and an outlay, and are excluded in calculating trust fund receipts and outlays. Intragovernmental transactions are payments from Federal funds to trust funds, and vice-versa. Intragovernmental transactions as shown in this table consist of Federal fund payments to trust funds only -- it does not include trust fund payments to Federal funds.

1/ For content see columns (7) and (8).

2/ For content see columns (10-13).

3/ Includes $45 million net taxes and $10 million other receipts, mainly deposits by States and Federal employee retirement contributions.

4/ This column excludes trust fund payments of $96 million to Federal funds, such as charges for administrative expenses of Social Security Act.

27/ Foundation 10 percent, foundation managers (if applicable) lesser of $5,000 or 2½ percent of the amount involved.

* Less than $500.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

Source and Availability of the Balance in the Treasurer's Account

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Source: Daily Treasury statement.

1/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

2/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ United States savings notes first offered for sale as of May 1, 1967 and were discontinued after June 30, 1970.

3/ Retirement plan bonds first offered for sale as of January 1, 1963; tax and loss bonds first issued in March 1968.

4/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; and FUTA taxes beginning April 1970.

5/ Under a special procedure begun in March 1951, authorization was given during certain periods for income tax payments, or a portion of them made by checks of $10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure was discontinued in April 1967.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

2/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Table FD-9. - Status and Application of Statutory Limitation

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by the Act of March 17, 1971 (Public Law 92-5), provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States, shall not exceed in the aggregate $400 billion outstanding at any one time. Public Law 92-5 also provides that beginning March 17, 1971, and ending June 30, 1972, the public debt limit shall be temporarily increased by $30 billion to $430 billion.

The Act of June 30, 1967 (Public Law 90-39) provides that the face amount of beneficial interests and participations issued under section 302(c) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(c)) during the fiscal year 1968 and outstanding at any time shall be added to the amount otherwise taken into account in determining whether the requirements of the above provisions are met.

Note: These securities were issued to the Treasury in exchange for advances by the Treasury from public debt receipts under congressional authorization for specified government corporations and other agencies to borrow from the Treasury. Further detail may be found in the 1970 Statistical Appendix to Annual Report of the Secretary of the Treasury, pages 310-14, and the 1970 Combined Statement of Receipts, Expenditures and Balances of the United States Government, pages 597-99.

1/ And predecessor agencies. Beginning fiscal 1957 figures exclude notes previously issued by the Administrator in connection with informational media guaranties. The obligation for these notes was assumed by the Director of the United States Information Agency, pursuant to the act approved July 18, 1956 (22 U.S.C. 1442), and the notes together with others issued for the same purpose are included in "Other."

2/ Farm housing and other loan programs, Agricultural Credit Insurance Fund (formerly Farm Tenant Mortgage Insurance Fund), and Rural Housing Insurance Fund.

3/ Includes securities transferred from the Reconstruction Finance Corporation.

4/ Consists of notes issued to borrow for: The urban renewal program (formerly slum clearance program); college housing loans; public facility loans; Low Rent Public Housing Fund; and advances for National Flood Insurance Fund.

5/ Consists of liabilities taken over by the Association from the Secretary in accordance with the act approved August 2, 1954, and notes issued by the Association under authority of that act (12 U.S.C. 1719 (c), 1720 (d), and 1721 (d)) and also securities transferred from the Reconstruction Finance Corporation.

6/ Public Housing Administration 1960-1963; Federal Housing Administration beginning January 1966; Housing Assistance Administration from September 1968 - December 1969.

7/ Consists of notes of: The Administrator, General Services Administration, for defense materials procurement; the Secretary of Agriculture; the Secretary of Interior (Defense Minerals Exploration Administration); the Export-Import Bank of Washington through March 1962; and the Secretary of the Treasury through May 1964.

8/ Consists of notes issued by the: United States Information Agency for informational media guaranties (see footnote 1); Secretary of Commerce (Maritime Administration) for the Federal Ship Mortgage Insurance Fund, fiscal years 1963-67; Virgin Islands Corporation from September 1959 - September 1968; District of Columbia Commissioners for the Stadium Sinking Fund from June 1962 - June 1970; Secretary of the Interior (Bureau of Mines) for development and operation of helium properties beginning May 1964; and Bureau of Commercial Fisheries for Federal Ship Mortgage Insurance Fund, Fishing Vessels from January 1966 - May 1967; and revenue bonds for Smithsonian Institution (John F. Kennedy Center Parking Facilities) beginning July 1968.

Footnotes to Table PDO-7

Source: Daily Treasury statement and Bureau of the Public Debt.

1/ Original call and maturity dates are used.

2/ All by investors other than Federal Reserve banks.

3/ Rolled over into 9-month and one-year bills (see Table PDO-4).

4/ Tax anticipation issue: for detail of offerings beginning July 1969, see Table PDO-4; for amounts redeemed for taxes and for cash see "Note" below.

5/ Of this amount $909 million of the 5-5/8% notes and $6,126 million of the 6-3/8% notes were submitted in payment for subscriptions allotted for the 7-3/4% Treasury Notes of Series G-1971 which were offered on a cash basis. Holders of the maturing notes were not offered preemptive rights to exchange their holdings for the new notes. (For detail of offerings see Table PDO-4.)

6/ Of this amount $10 million of the 6-3/8% notes and $180 million of the 4% bonds were exchanged by Federal Reserve banks and Government accounts for 7½% notes of Series C-1972. Other holders of the maturing securities were not given preemptive rights to exchange their holdings for the 7½% notes.

7/ Federal Reserve banks and Government accounts exchanged $1,500 million of the notes for 4-7/8% notes issued November 15, 1971.

p Preliminary.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

p Preliminary.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

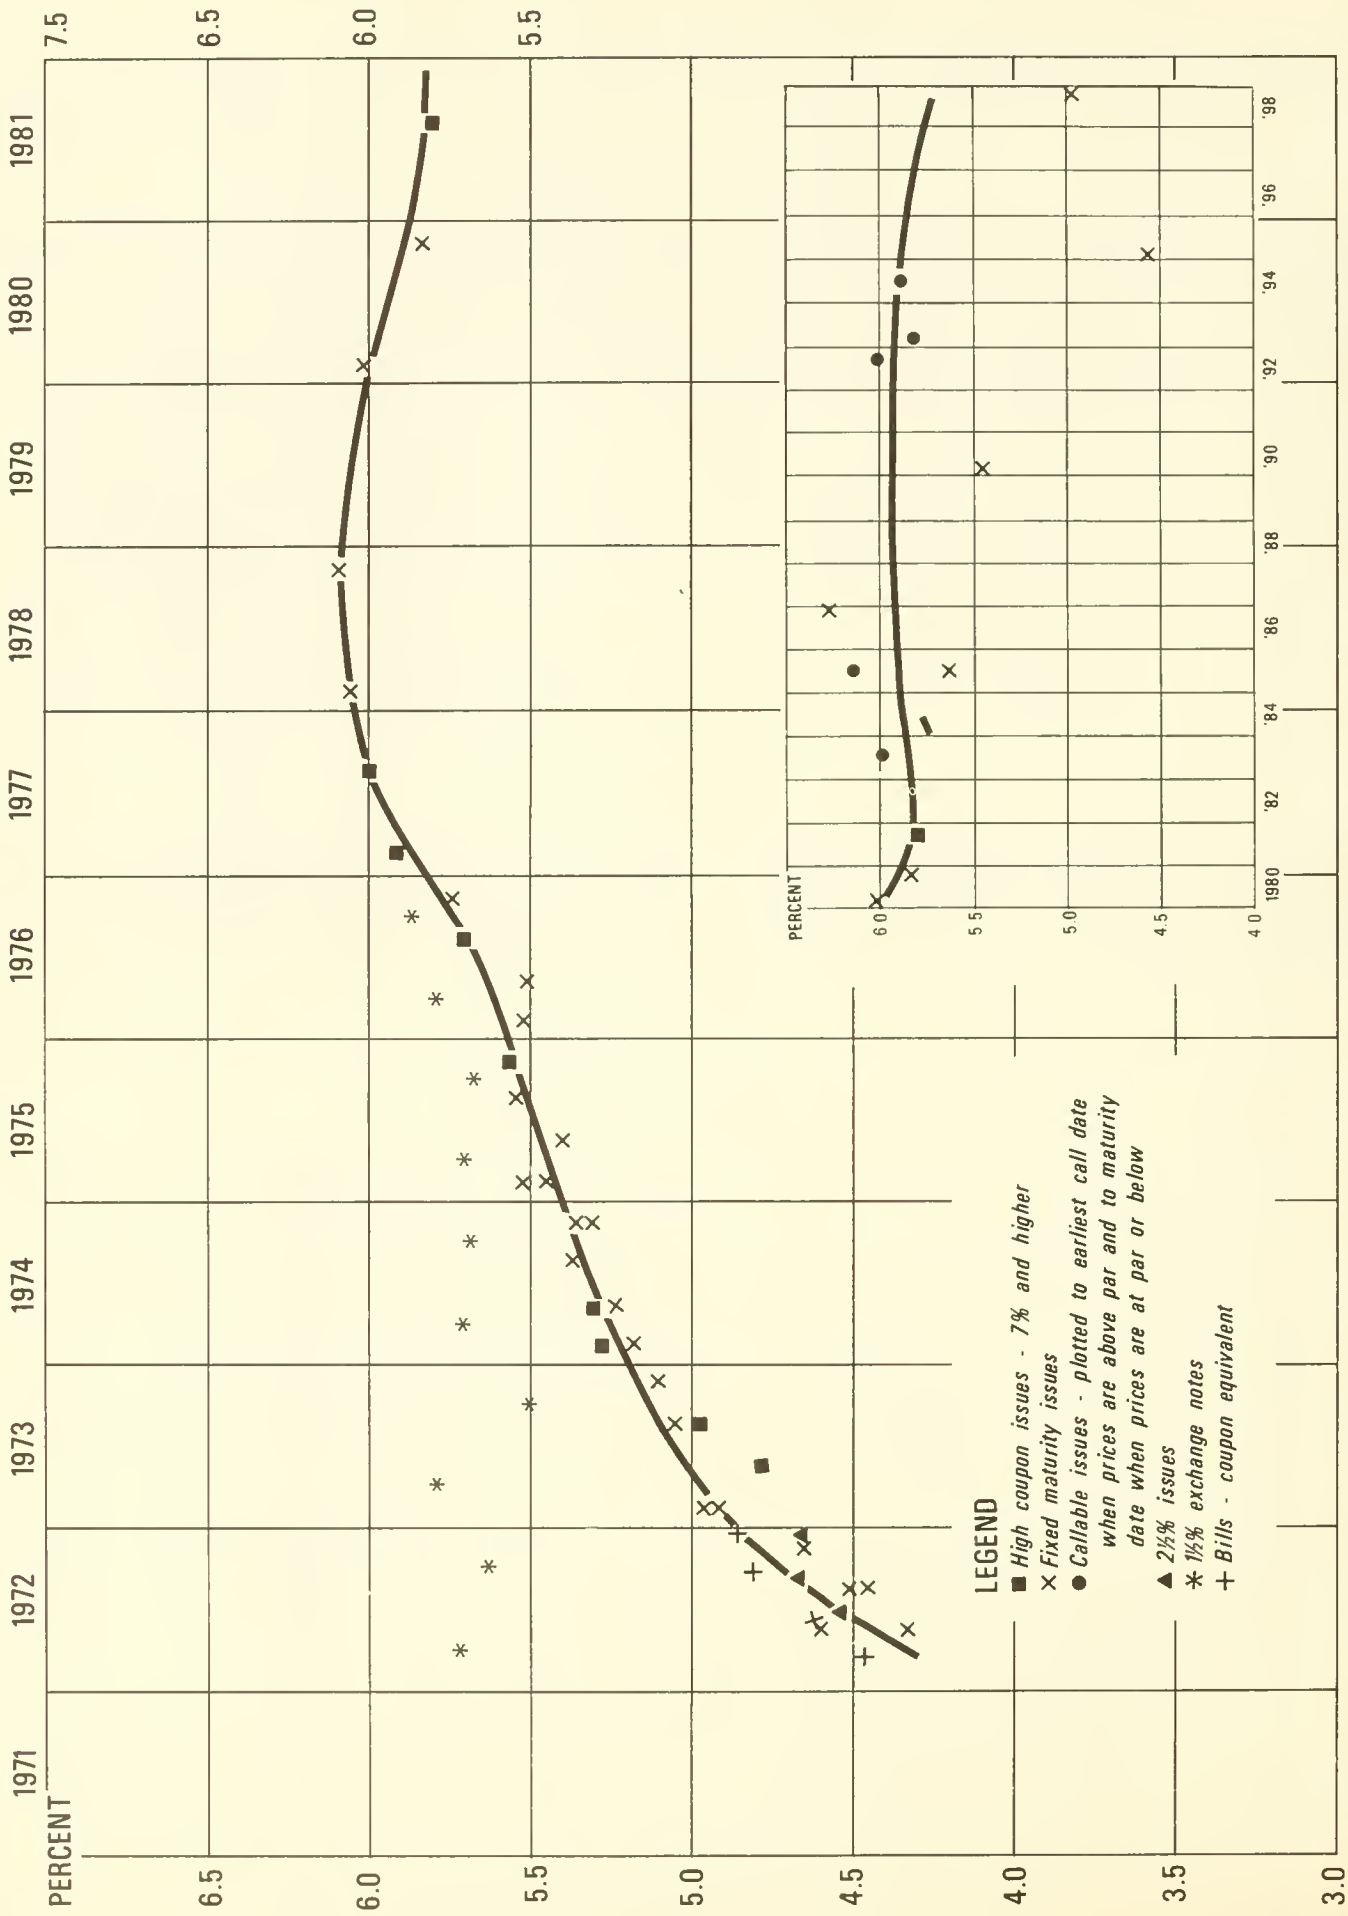
Beginning April 1953, prices are closing bid quotations in the over the counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long term taxable Treasury Bonds as shown under "Average Yields of Long Term Bonds."

YIELDS OF TREASURY SECURITIES, NOVEMBER 30, 1971

Based on Closing Bid Quotations



Note: The smooth curve is fitted by eye. Market yields on coupon issues due in less than 3 months are excluded.

Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

Treasury series based on reoffering yields of new corporate bonds rated Aa by Moody's Investors Service. The series is calculated to reflect bonds with no call protection. Currently 5 years of call protection is valued at 15 basis points.

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Investment Bankers Association of America. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table IFS-1 requires that the "holdings of dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting.

Table IFS-3 presents an area breakdown of United States liquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table TUS-4.

3/ Includes initial allocation on January 1, 1970, of $867 million and second allocation on January 1, 1971 of $717 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR.

4/ Includes holdings of Treasury and Federal Reserve System.

5/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the United States quota. See Table IFS-5.

6/ Reserve position includes, and gold stock excludes, $259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7/ Includes gain of $67 million resulting from revaluation of the German mark in October 1969, of which $13 million represents gain on German mark holdings at time of revaluation. See also footnotes 3 and 4, Table IFS-4.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

3/ Includes Bank for International Settlements and European Fund.

4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.

5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold investment." The difference, which amounted to $19 million as of the end of 1970, is included in this column.

7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

9/ Includes $17 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969.

Note: For further information, see "Public Debt Operations," Tables PDO-8 and 9.

1/ Includes bonds issued to the Government of Canada in connection with transactions under the Columbia River treaty. Amounts outstanding were $204 million, September 1964 through October 1965; $174 million, November 1965 through October 1966; $144 million, November 1966 through October 1967; $114 million, November 1967 through October 1968; $84 million, November 1968 through September 1969; $54 million, October 1969 through September 1970; and $24 million, October 1970 through October 1971.

2/ Bonds issued to the Government of Italy in connection with military purchases in the United States.

3/ In addition, nonmarketable Treasury notes amounting to $125 million equivalent were issued to a group of German commercial banks in June 1968. The revaluation of the German mark in October 1969 increased the dollar value of these notes by $10 million. See also footnote 7, Table IFS-1.

4/ Includes an increase in dollar value of $84 million resulting from revaluation of the German mark in October 1969. See also footnote 7, Table IFS-1.

5/ Increase in valuation resulted from redemption of outstanding Swiss franc securities at old exchange rate and reissue of securities at new exchange rate with same maturity dates, at time of revaluation of Swiss franc. The new issues include some certificates of indebtedness issued to replace notes which were within a year of maturity.

Note: The initial U.S. quota in the International Monetary Fund was $2,750 million. The U.S. quota was increased to $4,125 million in 1959, $5,160 million in February 1966, and to $6,700 million in December 1970. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table IFS-2).

2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.

5/ Includes $259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

6/ Includes $30 million of special drawing rights. * Less than $500,000.

1/ Includes in 1970 total (Oct.-Dec. 1970) the U.S. payment of $385 million increase in its gold subscription to the IMF and gold sold by the IMF to the United States in mitigation of U.S. sales to other countries making gold payments to the IMF. The country data include, for the same period, gold sales by the United States to various countries in connection with IMF quota payments. Such sales to countries and resales by the IMF totaled $548 million each.

2/ Includes International Monetary Fund gold sales to and purchases from the United States, gold deposits by the IMF (see Table IFS-2, footnote 1) and withdrawal of deposits. The first withdrawal, amounting to $17 million, was made in June 1968.

* Less than $500,000.

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of $500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is $100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are $500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of $1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is $100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

1/ Includes Bank for International Settlements and European Fund.

2/ Short-term U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

3/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank. Includes difference between cost value and face value of securities in IMF gold investment account ($19 million at end 1970).

4/ In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to $109 million at end 1960, $187 million at end 1961, and $61 million at end 1963.

5/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

6/ Increase in valuation resulted from redemption of outstanding Swiss franc securities at old exchange rate and reissue of securities at new exchange rate at time of revaluation of Swiss franc.

1/ Short-term U.S. Government obligations at cost value, and deposits awaiting investment (less than $500,000 on all dates shown), obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

2/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank; excludes Bank for International Settlements and European Fund. Includes difference between cost value and face value of securities in IMF gold investment account ($19 million at end 1970).

3/ Time deposits exclude negotiable time certificates of deposit, which are included in "Other short-term liabilities."

4/ In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to $109 million at end 1960, $187 million at end 1961, and $61 million at end 1963.

5/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

Note: Data represent estimated official and private holdings of marketable U.S. Government securities with an original maturity of more than one year. Data shown as of end year 1968 through end year 1970 (first column) are based on November 30, 1968 benchmark Survey of holdings and the regular monthly reports of securities transactions (see Table CM-V-3). Data shown for end year 1970 (second column) through latest date are based on a benchmark survey as of January 31, 1971, and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1970, rather than as of the survey date. The difference between the two series is believed to arise from errors in reporting during the period between the two benchmark surveys, from shifts in ownership not involving purchases or sales through U.S. banks and brokers, and from physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I, Table GA-I-1. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and were presented in the August 1956 Bulletin. Loans shown on the statements of financial condition are classified by type and account in Section III, Table GA-III-2. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Section I, Tables GA-I-2 and GA-I-3. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. All funds shown in the statements are noted to indicate whether they are public enterprise revolving funds, intragovernmental revolving funds, trust or trust revolving funds, or general and special funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a business-type nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. Statements submitted under this supplement are now published annually in Section II, Table GA-II-1. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions.
